

## **Trees as Habitats**

PLT Early Childhood # 10

K-8 guide #22

## **Tree Benefits**

**Primary  
Trees as Habitat Lesson 10**

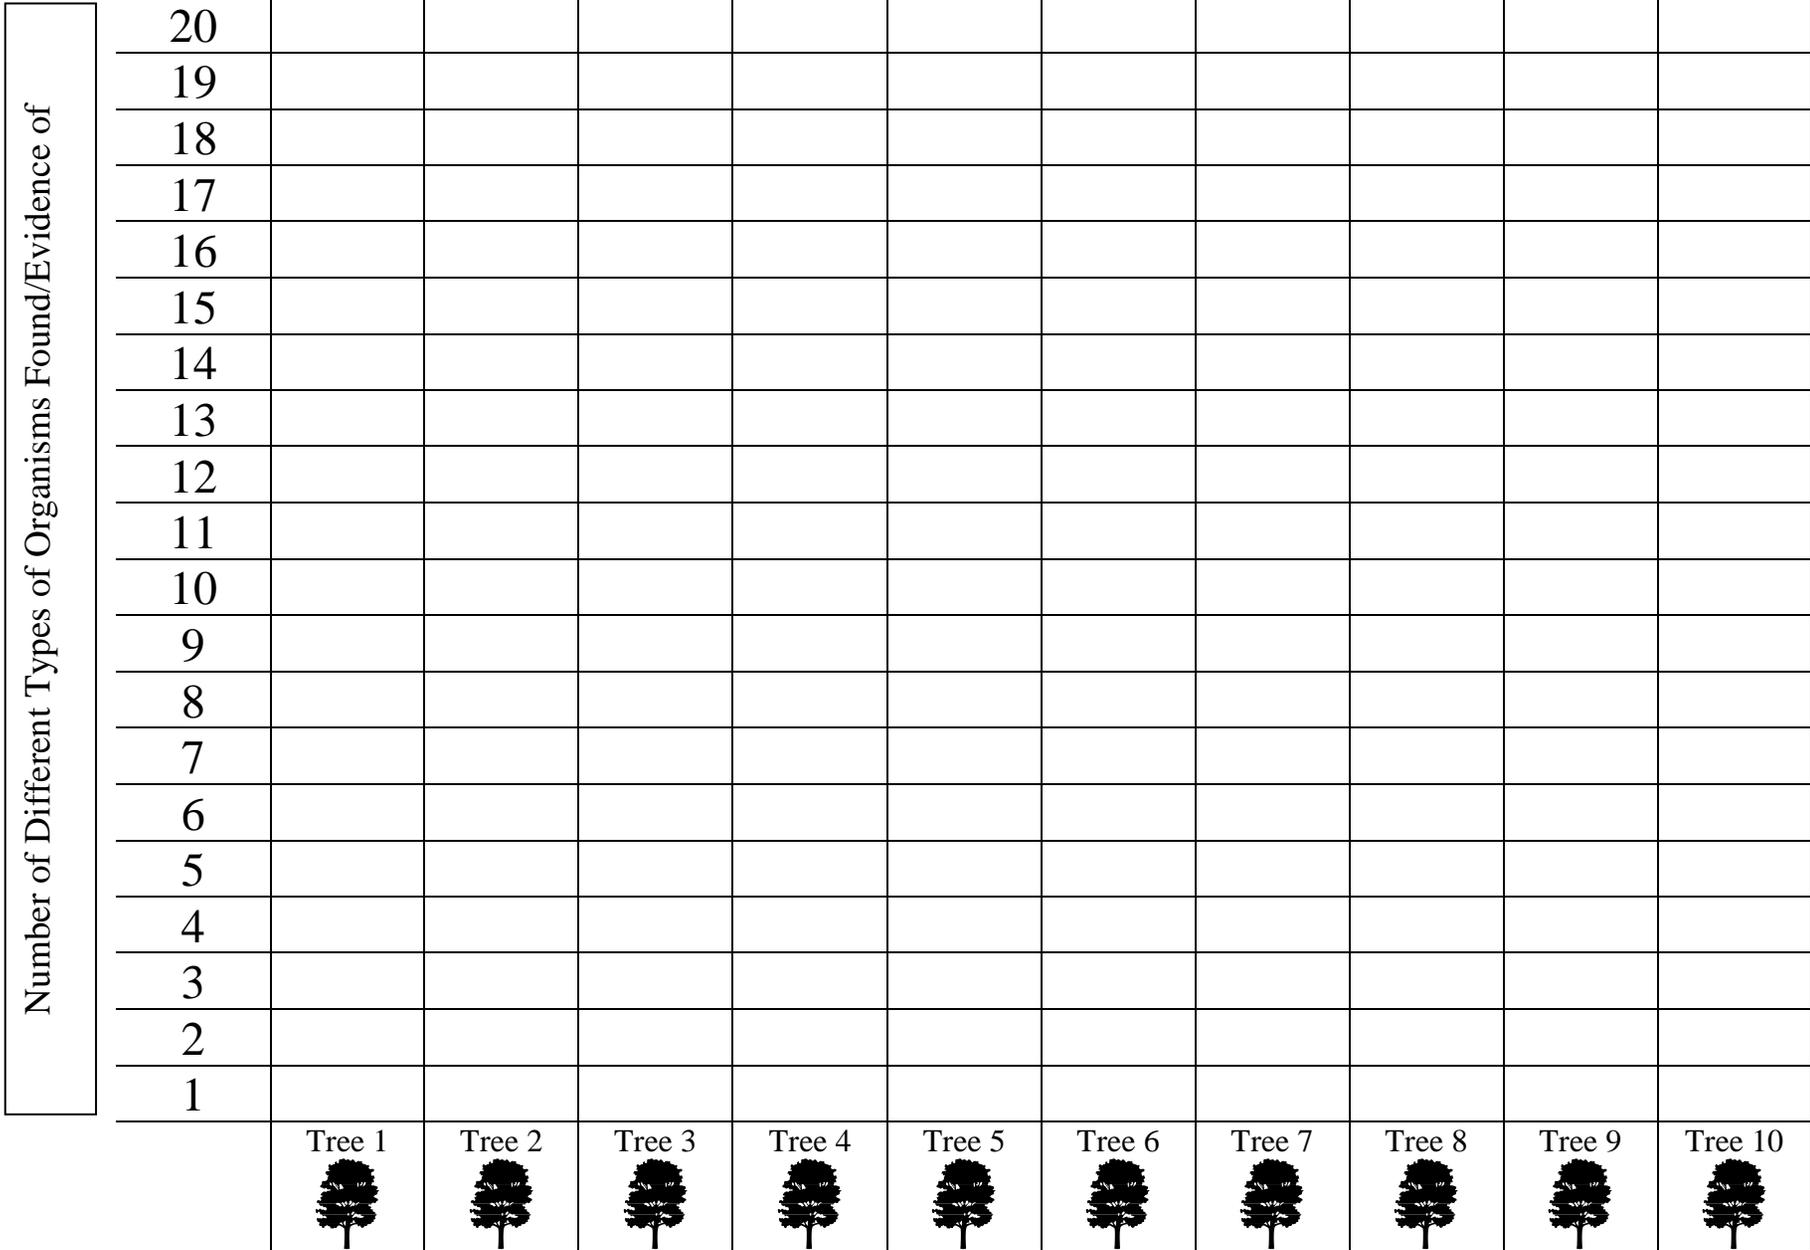

Mark off any plants, animals, or fungi that you found on the tree.

<p><b>Lichens</b></p> 	<p><b>Ferns</b></p> 	<p><b>Mushrooms</b></p> 
<p><b>Moss</b></p> 	<p><b>Slug</b></p> 	<p><b>Spider</b></p> 
<p><b>Bird or bird nest</b></p>  	<p><b>Ants</b></p> 	<p><b>Squirrel</b></p> 

What else did you find living on or near the tree?

## Graph the Numbers of Different Types of Organisms Found or Evidence of on the Tree Observed

*Categorize the organisms and evidence of organisms you found.*

<b>Category-Plants (other than mosses and lichens)</b>	<b>Category-Animals</b>
<b>Category- Fungi</b>	<b>Category- Moss and Lichens</b>

## Claim, Evidence, Reasoning

Write a scientific explanation that answers the question: **Do trees provide habitat for a diversity of organisms?**

**Claim**

**Evidence**

**Reasoning**

## Talk Moves for Trees as Habitats

**Answer the Question:** Do trees provide habitat for a diversity of organisms?

1. Yes/No I (do/don't) think that trees provide habitat for a diversity of organisms.

Today, \_\_\_\_\_, we observed trees in teams and found (answer the question).

2. I agree/disagree with your claim that \_\_\_\_\_  
and the evidence is that \_\_\_\_\_  
(Give mean and/or range of data)

3. I agree/disagree. We also found \_\_\_\_\_. I think how  
we collected data could be improved by\_\_\_\_\_.

4. Let me summarize what we just discussed.

Name of Tree \_\_\_\_\_

Circumference (C) \_\_\_\_\_ inches

To calculate diameter:

Circumference  $\div$   $\pi$  (3.14) = \_\_\_\_\_ Diameter (do not record numbers after the decimal)

### STORMWATER

How many gallons of runoff will your tree stop this year? \_\_\_\_\_

*Look at the bullet points to answer this next set of questions.*

Trees reduce run-off by:

- Intercepting and \_\_\_\_\_ rain on leaves, branches, and bark
- Increasing infiltration and storage of rainwater through the \_\_\_\_\_
- Reducing soil \_\_\_\_\_ by slowing rainfall before it strikes the soil

### CO<sub>2</sub>

Your tree will reduce carbon in the atmosphere by \_\_\_\_\_ pounds this year.

An “average” car generates \_\_\_\_\_ pounds of CO<sub>2</sub> every year.

In the first bullet point we learn that trees reduce carbon in the atmosphere because they lock up \_\_\_\_\_ in their \_\_\_\_\_ while they grow and in wood products after they are harvested.
